# INTRODUCTION

Smart Resume Analyzer is an AI-powered tool that automatically reads, interprets, and evaluates resumes to identify key qualifications .

Manual resume screening is inefficient, subjective, and often overlooks qualified candidates.

AIU seeks an intelligent solution to improve recruitment effectiveness.

# PROBLEM STATEMENT

Manual Traditional System Inefficiencies.

Incomplete Information Analysis and Administrative Burden.

Poor Candidate Communication and Experience.

Time-Consuming File Management Process.

# Research Questions - Research Objectives *"winning minds"*

## Research Questions

- 1.What are the limitations and challenges of the existing system framework in accurately analyzing resumes for skills, qualifications, and relevant experiences based on job descriptions?
- 2.How well does the resume analyzer help reduce hiring bias, based on feedback from HR and system reviews at AIU?
- 3.How can we create a secure and user-friendly dashboard to help HR quickly see and manage resume data for better hiring ?

## Research Objectives

- 1.To study the existing system framework that can automatically analyze resumes to identify key skills, qualifications, and relevant experiences based on resumes.
- 2.To design and develop a resume analyzer for AIU HR personnel using NLP tools.
- 3.To build a secure, interactive dashboard for HR to visualize and manage resume analytics for faster, efficient, and accurate data-driven hiring decisions.

## 2. Literature Review

**A. Sinha et al. (2024)** used **BERT** for named entity detection and an **NLP pipeline** to extract data from resumes. However, the system struggles with processing unstructured data, highlighting the need for more advanced methods.

**Arlene Casey et al. (2024)** proposed a system that uses **NLP** to suggest personalized training paths for job seekers. The system lacks the ability to offer personalized skill recommendations based on resume analysis.

**Ms. Sophiya Sugantha Grace M et al. (2024)** used **text mining**, **sentiment analysis**, and **TFIDF** to automate screening. The study recommends exploring advanced deep learning techniques and novel layout concepts for better performance.

**Sakshi & Prakash (2024)** applied **NLP** to rank resumes. The research identifies a gap in transparency, as the system does not explain why certain candidates match specific jobs.

**Ms. Y. Sowjanya et al. (2023)** combined **NLP pipelines** and **machine learning** for parsing. The system needs to adapt to various industries and resume formats to be more effective.

**Khaire (2021)** developed an automatic **resume reading tool** using **NLP**. The system lacks flexible evaluation rules across different industries, emphasizing the need for industry-specific solutions.

# 2.Literature Review

*"inspiring minds"*

Based on the reviewed of **30 related papers**, the summary, gaps and weaknesses in **existing systems** were identified:

- 1. Lack of robust NLP-based resume parsing:** Many systems fail to accurately parse and structure data from **unstructured resume formats**, indicating a need for **advanced NLP-powered parsing**.
- 2. Opaque ATS scoring systems:** Many ATS platforms rely on **generic scoring** without providing transparency about the specific factors contributing to the score, highlighting the need for more transparent **ATS scoring methods**.
- 3. Insecure authentication protocols:** Resume analyzers often lack **secure login** mechanisms and use **basic form-based authentication**, which points to a gap in robust **authentication systems**.
- 4. Ineffective skill gap detection:** Existing systems do not personalize skill gap detection, failing to match candidates with **customized skill training** recommendations based on detailed job requirements.

# Use Case Diagram

"Inspiring minds"

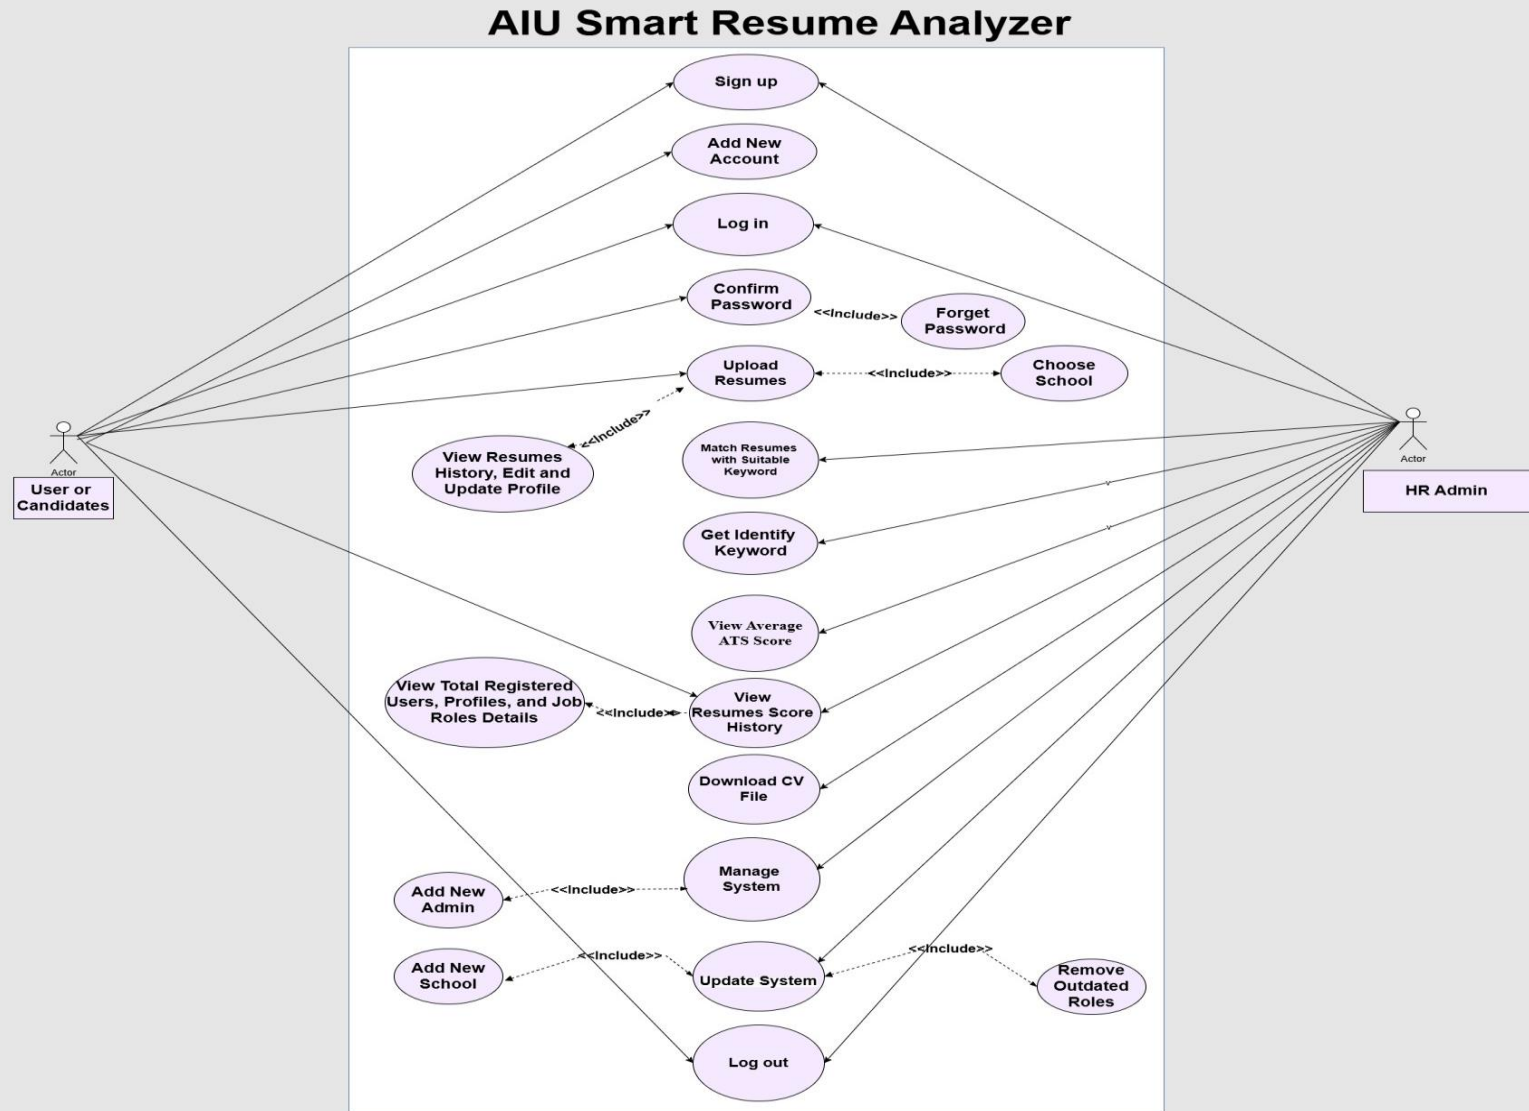

Figure: Use Case Diagram

# Activity Diagram

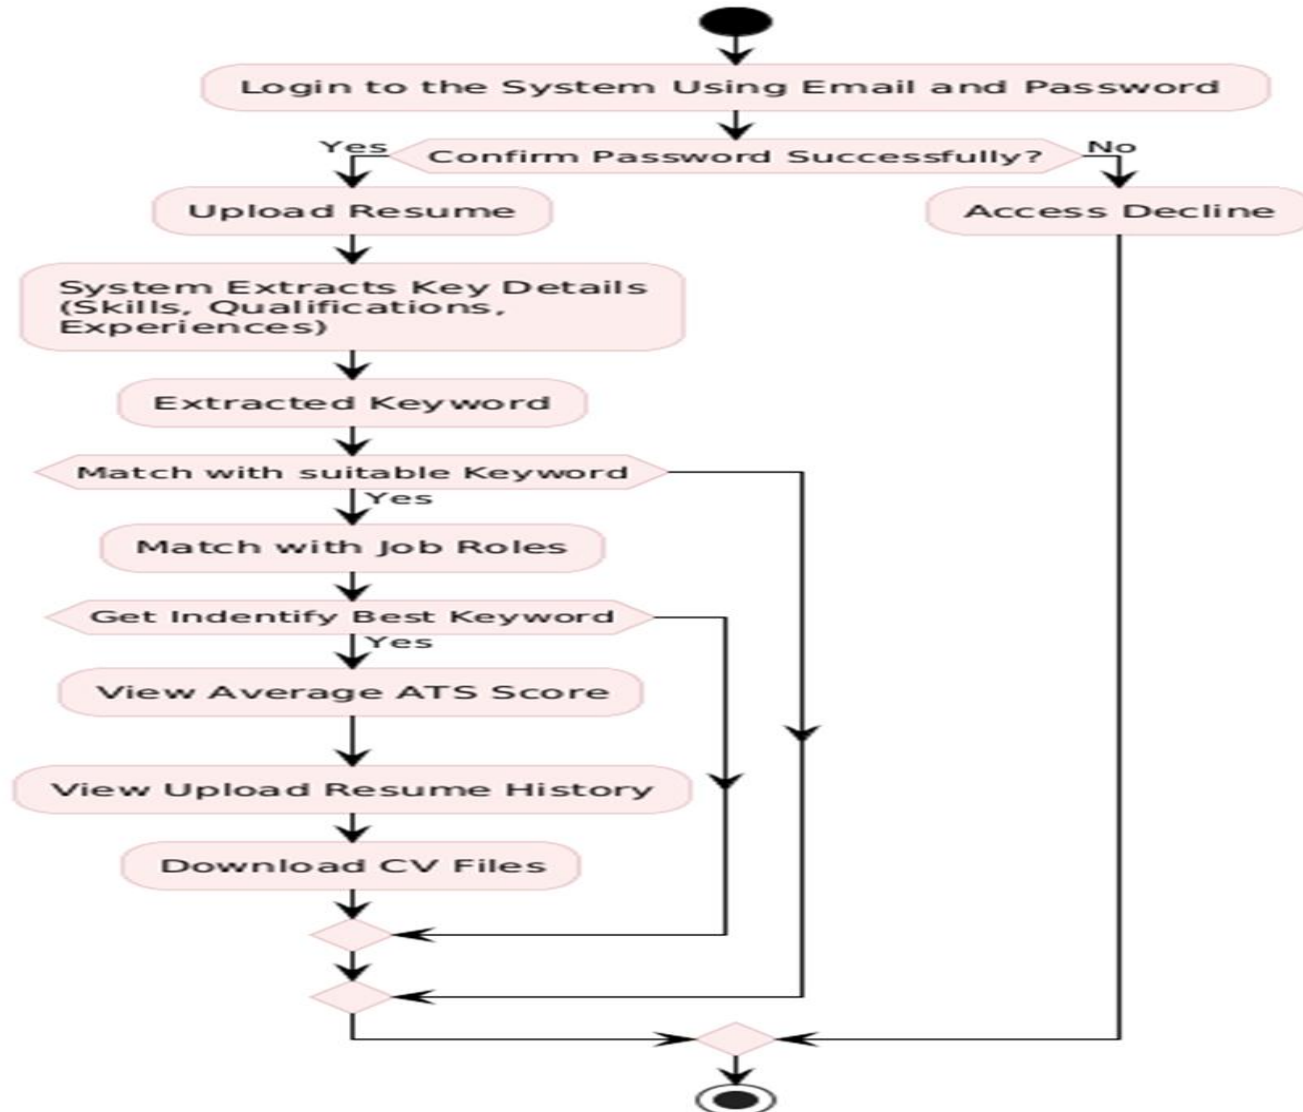

Figure: Activity Diagram

# SOFTWARE REQUIREMENTS

**Frontend:** HTML, CSS, JavaScript .

**Backend:** Fast API, NLP, Python

**Database:** Firestore (NoSQL), Firestore Admin

**Modules:** PDF Resume Parser using PDF Miner, NLP with spaCy (Model) for keyword matching, JSON Web Tokens(JWT)-secured login/authentication

**Cloud Services:** Firebase Authentication, Firebase Cloud Storage, Google Cloud Platform

# HARDWARE REQUIREMENTS

Hardware	Purpose/Interpretation
Development Workstations	Multi-core processors (e.g., Intel i7 or AMD Ryzen 7), minimum 16GB RAM, SSD for fast data access and storage
Backup and Redundancy Systems	Ensures stable connectivity and includes backup storage to safeguard data.
Network Equipment	Routers, switches, and network cables for stable connectivity; includes backup storage solutions

# FUNCTIONAL REQUIREMENTS

Requirement	Actor	Action
Sign up and log in with email and password	User	Sign up / log in
Reset forgotten password via email link	User	Reset password
Edit User Profile details	User	Edit profile
Select schools of interest	User	Choose preferences
Upload resume in PDF format	User	Upload resume
Notify user of successful CV delivery	System	Send confirmation of Successful Uploaded Resume

# FUNCTIONAL REQUIREMENTS

Requirement	Actor	Action
Track resume status (opened/analyzed)	User	View resume status
Secure admin login	Admin	Log in
View users, resumes, and job roles	Admin	View system data
Monitor resume analysis & ATS compatibility	Admin	Track analytics
Add new admin accounts	Admin	Manage admin access
Extract skills, qualifications, and experience from resumes	System	Auto-scan resumes

# User Interface Design

Figure 1 : Registration Page

The registration page features a dark blue header with the text "Resume Analyzer" in white. The background is a vibrant image of a modern building with palm trees under a clear blue sky. A dark, semi-transparent registration form is centered on the right side. The form includes fields for "Full Name", "Email Address", "Phone Number", "Password", and "Confirm Password", each with a corresponding icon (person, envelope, phone, and lock). Below the password fields, there is a checkbox for "I agree to the Terms & Conditions and Privacy Policy" and a "Register" button. A link for "Already have an account? Login here" is also present. At the bottom of the form, it says "© DEVELOPED BY SCHOOL OF COMPUTING AND INFORMATICS".

[← Back to user login](#)

### 1.Admin Dashboard – System Overview

Shows real-time stats: users, resumes uploaded/analyzed, and average ATS scores.

### 2.Resume Management

Admins can view, download, or delete resumes with full candidate details.

### 3.Resume Analyzer

Runs ATS analysis with scores, keyword match, and suggestions.

### 4.Admin Accounts Management

Create or delete admins; view their details and activity logs.

## ATS System Scoring Framework

Category	Max Points	Keywords	Assessment Purpose
Technical Skills	10	LMS, Moodle, Blackboard, management, E-learning platforms, SPSS, Statistical software, Excel, Microsoft Excel, Microsoft Office, Qualitative analysis, Research methodology, Teaching tools, Academic software, Learning analytics.	Evaluate technical competency
Soft Skills	15	Communication, Leadership, Teamwork, Adaptability, Problem-solving .	Assess interpersonal abilities
Language Proficiency	10	English	Evaluate language readiness
Achievements	5	Research grants, Employee recognition, Dean's list, Competition achievements, Certifications.	Identify exceptional performance
Sections Presence	25	Education, Skills, Experience sections	Check resume structure
Candidate Profile	15	Full Name, Email, Phone, Address, LinkedIn	Verify contact completeness
Work Experience	10	University lecturer, Professor role, Course development, Lecture preparation, Student mentorship, Research supervision, Teaching assistant, Administrative experience, Technical support, Project management, Office management, Data analysis, Systems administrator, Technical documentation .	Measure professional background
TOTAL	100	Complete evaluation system	Overall candidate assessment

# Testing Results

## Performance Comparison:

- **Success Rate:** Based on the ATS scoring results >90% accuracy in skill-based matching
- **Admin Feedback:** Positive usability response from the AIU HR Administrators

## Features Delivered:

- ATS Report Generator
- User/Admin Roles with Role-Based Access

## ATS Scoring Results Table

Candidate Name	ATS Score	Recommendation
Candidate A	83.8%	Will Get the Interview Call From HR
Candidate B	47.1%	Will not get the Interviews call form The HR

# Future Work

1. Candidate Position Prediction Level module
2. Resume visualization and downloadable ATS reports
3. AI career mentor via LLM
4. University-wide integration with AIU recruitment portal
5. Multilingual support and personalized resume tips
6. Candidate Level Prediction module

## 5. Conclusion

The AIU Smart Resume Analyzer improves recruitment by using NLP and secure data practices to automate resume screening and reduce bias. To facilitate recruitment decision making.

The system is efficient, scalable, and supports career growth through accurate job matching and an interactive dashboard.

Future improvements should include advanced AI for deeper analysis, a super admin for better management, and integration with the AIU website for easier access by students and external users.

## 6. Contribution to Social Business

- **UN SDG Goal 8 ( Goal 8: Decent Work and Economic Growth ):**  
Helps hire the right and skilled people, improving productivity and supporting economic growth.
- **UN SDG Goal 5 (Gender Equality):**  
Supports fair hiring by focusing on skills, not gender or background, to reduce bias.
- **Digital Sustainability:**  
Promotes ethical and inclusive use of AI in recruitment, supporting sustainable social and economic development.
